AMENDMENTS

Claims:

1 (currently amended). A method for formulating an essential oil based composition for aromatherapy treatment comprising:

performing an analysis of an individual whereby a profile of said individual is prepared, said profile containing individual information concerning one or more conditions of the individual;

determining from [[the value]] said profile whether one or more essential oils ~~in an essential oil universe database expressed in electronic media~~ may be excluded from an essential oil universe comprising a plurality of essential oils to form an active essential oil universe;

generating a sub-set that contains only oils associated with the given [[value]] condition in said profile;

selecting a primary essential oil from the sub-set based on the analysis;

and generating a primary essential oil family set;

selecting a second essential oil and any subsequent oils from the primary essential oil family set;

selecting a second essential oil and any subsequent oils from the primary essential oil family set, based on the analysis;

said steps for selecting the second essential oil, being repeated for any additional essential oils to be selected;

Claims 2-37 (canceled).

- 38 (new). The method according to claim 1 wherein the conditions include physical conditions, emotional conditions and spiritual conditions.
- 39 (new). The method according to claim 38 wherein one of the conditions is the health status of the user.
- 40(new). The method according to claim 39 wherein one of the conditions is the personality of the user.
- 41 (new). The method according to claim 40 wherein an essential oil is excluded based on one or more of its properties.
- 42 (new). The method according to claim 41 wherein one of the conditions is based on a personality profile of the user.
- 43 (new). A method for formulating an essential oil based composition comprising preparing a profile of a user, said profile containing individual information concerning one or more conditions of the user;

comparing the user's profile with one or more properties of an essential oil;

selecting one or more essential oils based on the user's conditions.

44 (new). The method according to claim 43 wherein a plurality of essential oils are combined to form a composition.

45 (new). The method according to claim 43 wherein the conditions include physical conditions, emotional conditions and spiritual conditions.

46 (new). The method according to claim 45 wherein one of the conditions is the health status of the user.
